

Duplicate Checking

From CFMNUS #20, there are multiple ways to identify and merge duplicate subjects.

Possible Duplicate Subject Processing.

On options 2-7, run trial before running final.

1. Check first 30 name, 30 address (final only).
2. Check first 10 name, 10 address (trial).
3. Check first 10 name, 10 address (final).
4. Check first 15 name, 10 city (trial).
5. Check first 15 name, 10 city (final).
6. Check first 10 name, 5 address, 5 city (trial).
7. Check first 10 name, 5 address, 5 city (final).
10. Subject to change maintenance (SUBCHGDS).
12. Apply subject changes.
90. EXIT

Each of the options creates an edit report of what is identified to merge, and creates a file to perform the merging process.

```

To remove a merge selection, take #10, and key D in delete.

```
Subject drop 80642  
  
Subject keep 283805  
(D)delete
```

When finished, CMD 7 to end and then Y and enter.

To apply the changes, take #12.
